
INPUT
PROCESS
OUTPUT
A Taglish disaster tweet
Example
"Kailangan namin ng tubig at pagkain dito sa Brgy. San Isidro, Rodriguez. Wala pang relief na dumarating."
1. Split the tweet into tokens
2. The shared encoder reads the tokens and converts them into numbers
3. Two task heads make predictions from the same numbers
– Classification head
– Named entity recognition head
• Humanitarian category
Requests or urgent needs
• Named entities
Brgy. San Isidro (location)
Rodriguez (location)
tubig, pagkain (resource)
